

METEORITE  
*Collection*

SAMUEL & SONS

# Meteorite

*This atelier collection of visionary tiebacks was the artistic collaboration of the Samuel & Sons Design Studio and a consortium of distinctive resources.*

*Mesmerized by meteors, our studio set out to explore unique materials reminiscent of other-worldly radiance. Those with reflective surfaces, such as metals and multi-faceted crystals, created splendid tassel tieback molds while orbiting discs and festoons of feathers replicated the trajectory of shooting stars. The Meteorite tassel tiebacks are predominantly linear in form and dramatic in scale.*

## *Ellipse* TASSEL TIEBACK

Consists of five concentric, black acrylic discs divided by lustrous silver yarn-covered orbs. A sleek skirt extends from the bottom disc, making this 13.5" tassel a true statement piece.

*Ellipse Tassel Tieback in Carbon*

## *Aero* TASSEL TIEBACK

Features a multifaceted hexagonal hand-cut crystal mold, a luminescent wonder. The crystal complements a sleek skirt which derives dimension from combining matte linen and lustrous rayon. Light bounces off the facets of the Aero tassel tieback's fine cut crystal molds creating a radiant aura while at the same time illuminating the lustrous yarns in the sleek skirt. This luminance in contrast with the occasional matte surface accentuates each tiebacks dimensionality.

*Aero Tassel Tieback in Stardust*

*Aero Tassel Tieback in Mercury, Ice and Onyx*

## *Solaris* TASSEL TIEBACK

Dramatic in scale and linear form, Solaris is a sophisticated matte metallic tassel tieback with an etched metal sleeve accent. The tassel construction is such that it's adjustable on its double cord loops, enabling more versatility in application. This 17" tassel is striking in scale, glimmers like the stars in the night sky, modern in its hues, and features a linear, minimalistic approach to sophistication.

*Solaris Tassel Tieback in Zinc and Platinum*

## *Celestial Feather* HOLDBACK

Composed of goose feathers in an array of neutral shades, this beautiful holdback is natural in form and sculptural in its dimensionality. Brushed silver endcaps and waxed cotton cord loops transform this organic holdback into a sleek, contemporary piece.

*Celestial Feather Holdback in Moonbeam*

*Moonbeam*

*Alloy*

*Carbon*

# Abrielle

## TASSEL TIEBACK

The most predominant characteristic of these tiebacks is the cube knot mold in which individually braided cords are macraméd together. This complex mold is balanced by the tieback's straight skirt from which the inherent beauty of the fibers exude, elevating this organic design to a new level of sophistication.

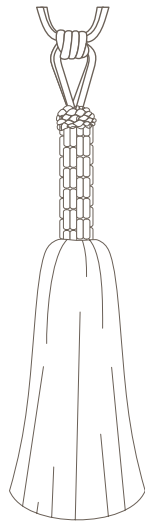

*Abrielle Tassel Tieback in Cream, Flax and Burlap*
